### Defect

Due to a manufacturing process, the clutch may not fully disengage when the clutch lever is pulled all the way to the handlebar. If this occurs, it could cause an unintended movement of the vehicle.

### Hazard

An unintended movement of the vehicle may increase the risk of an accident, causing serious injuries or death to the rider and/or passenger, or other road users.

### What to do

Owners of affected vehicles can contact their authorised Yamaha Dealer to schedule an appointment to have the motorcycle inspected free of charge.
